Who We Are (About Nayx)

Transforming Healthcare Workforce Connectivity

Nayx is revolutionizing how healthcare facilities manage workforce demand and how clinical professionals scale their careers. By combining real-time provider availability with intelligent algorithmic matching and automated shift coordination, Nayx eliminates traditional staffing agency markups, accelerates time-to-fill, and ensures complete rate transparency across all care settings.

Powered by an **Autonomous AI Career Agent**, the platform streamlines locum placements and resolves clinical staffing shortages in real time—giving providers total career freedom on autopilot while keeping facilities fully staffed. Further elevated by built-in, offline AI documentation, Nayx dramatically reduces administrative charting friction to deliver a modern, friction-free healthcare workforce ecosystem.

- **10,000+** Verified Healthcare Professionals
- **500+** Partner Facilities & Health Systems
- **Real-Time** Autonomous Shift Matching
- **0%** Hidden Staffing Agency Fees

Why Choose NAYX

Built for Healthcare Trusted by Professionals

Nayx bridges the gap between healthcare organizations and clinical talent through **intelligent automation**. By replacing slow, costly middleman agencies with direct AI matching and private on-device tools, Nayx delivers **speed, financial transparency, and operational control** across every care setting.

1. Instant Matching

Skip recruiter delays. Intelligent algorithms connect facilities with verified clinicians in real time to fill shifts fast.

2. Zero Agency Fee

Cut third-party markups. Facilities lower labor costs while clinicians enjoy transparent, competitive pay.

3. Complete Control

Clinicians get total schedule flexibility, while facilities track coverage and staffing metrics effortlessly.

4. AI Privacy

Generate SOAP notes locally. Audio and notes stay 100% on the physical device for total HIPAA compliance.

Services

Our Trusted AI Workforce Solutions

Whether you need to scale contingent clinical teams or secure on-demand coverage, Nayx provides automated, transparent, and intelligent healthcare staffing solutions tailored to your organization's specific needs.

- **Hospitals & Health Systems**
Manage large-scale contingent staffing and dynamically absorb patient volume spikes using real-time AI talent matching and automated workforce coordination.
 - **Private Clinics**
Instantly fill part-time, weekend, or last-minute shift vacancies with local, credentialed professionals without taking on expensive agency overhead.
 - **Solo Practitioners**
Ensure uninterrupted practice operations by securing reliable locum tenens coverage during leaves, vacations, or peak appointment schedules.
 - **Rural & Community Healthcare**
Eliminate geographic staffing barriers by connecting remote facilities directly with on-demand nurses, physicians, and allied health workers willing to travel.
 - **Specialists & Clinical Experts**
Source verified niche specialists for targeted procedural days, complex consultations, or temporary clinical program expansions.
 - **Telehealth & Virtual Care**
Scale your digital health platform rapidly with flexible, remote clinicians verified for cross-regional practice and virtual consultation needs.
-

Dual Marketplace & Career Solutions

Nayx powers an intelligent dual-marketplace platform that connects healthcare organizations directly with top clinical talent in real time.

For Professionals: Find flexible shifts on autopilot with our automated AI career agent, transparent pay structures, and 100% on-device AI documentation.

For Facilities: Eliminate clinical staffing shortages, bypass middleman agency markups, and manage scheduling through one automated central dashboard.

How Nayx Works

A simple 4-step process connecting top clinical talent with healthcare facilities through autonomous AI agents.

1. Post Shift Demand

Clinicians set career preferences via AI. Facilities post open shifts, pay rates, and requirements directly on their dashboard.

2. Autonomous AI Matching

Intelligent algorithms match credentials, specialty, location, and availability to pair open shifts with qualified talent instantly.

3. One-Click Placement

Automated credentialing and digital onboarding enable one-click shift acceptance—eliminating recruiter delays.

4. Transparent Approval & Fast Payouts

Verified work logs trigger fast clinician payouts and real-time workforce analytics for facilities.

FAQ Section

(Please implement this FAQ section in a collapsible dropdown format above the footer)

Q1: What is Nayx?

A: Nayx is an AI-powered healthcare workforce and practice management platform that connects hospitals, clinics, and health systems directly with verified clinical talent. By replacing traditional middleman agencies with intelligent automation, Nayx eliminates hidden markups, offers 100% rate transparency, and provides clinicians with built-in, on-device AI documentation.

Q2: How does the AI career agent work for clinicians?

A: The AI career agent serves as an autonomous job-matching partner. Clinicians simply set their location boundaries, specialty, availability, and target pay rates. The automated AI agent continuously scans, filters, and applies to matching shifts on autopilot, removing the hassle of manual job hunting.

Q3: Who is Nayx built for?

A: Nayx operates a dual marketplace serving both **Healthcare Professionals** (nurses, physicians, and allied health workers looking for flexible shifts and career control) and

Healthcare Facilities (hospitals, private clinics, telehealth providers, and rural care centers seeking fast, transparent staffing).

Q4: How does Nayx fill shifts faster and cheaper than traditional staffing agencies?

A: Traditional agencies rely on slow recruiter phone calls and charge 40%–60% markups. Nayx uses real-time algorithmic matching to connect pre-verified, nearby clinicians with vacant shifts in sub-10 milliseconds. Facilities get transparent, upfront pricing with 0% hidden agency fees, lowering labor costs while ensuring clinicians earn competitive rates.

Q5: How does Nayx handle credential verification and compliance?

A: Before clinicians are matched, Nayx performs automated credentialing, state license verification, and background checks. Facility administrators can review audit-ready, verified credentials, work history, and peer ratings directly on their central dashboard before confirming a booking.

Q6: What is 100% On-Device AI Documentation, and is it secure?

A: Nayx includes a native, offline AI documentation feature that allows clinicians to generate structured SOAP notes from patient encounters in seconds. Because all processing happens 100% locally on the clinician's physical device, no audio or note data is sent to the cloud. This guarantees 100% offline functionality (in signal-dead zones) while maintaining strict HIPAA and data privacy compliance.

Q7: Can clinicians edit AI-generated SOAP notes before finalizing?

A: Yes. Clinicians retain full editorial control. After the AI structures the clinical note using one of 40+ medical templates, the provider can review, edit, and approve it with a single click before exporting it to their Electronic Health Record (EHR) system.

Q8: Is Nayx free for healthcare professionals?

A: Yes. Creating a profile, letting the automated AI agent match you to shifts, bidding on schedules, and using the offline AI documentation engine is 100% free for verified healthcare professionals.

Q9: How and when do clinicians get paid?

A: Payouts are fast and direct. Once a shift is completed and the digital work log is approved by the facility manager on the platform dashboard, payouts are processed automatically via direct deposit or instant transfer with zero middleman deductions.

Q10: Can clinicians choose their own schedule and travel distance?

A: Absolutely. Clinicians have 100% control over when, where, and how often they work. Whether looking for local per-diem shifts, weekend coverage, or long-term locum tenens placements, providers only bid on and accept the work that fits their lifestyle.
